

With **NBC MobilePOS**, you can enjoy the flexibility of processing transactions and returns anywhere you'd like—more specifically, wherever your customers are located. That's because our innovative, full-featured, cloud-based POS solution fits in the palm of your hand, so it travels wherever you do. Now you can develop a variety of seasonal or standalone retail experiences, expand into campus coffee shops or dining locations, mobilize your staff to accommodate a new line-busting checkout model, or simply streamline transactions at your traditional retail locations. From textbook rentals to sales, make every transaction easier, faster, and more convenient—for your customers as well as for yourself.

FEATURES

- Money and space savings due to decreased size and cost of traditional registers
- Decreased outages and secure customer and card information through the use of point-to-point encryption (P2Pe) and tokenization
- Accept the same accounts receivable tenders processed at traditional point-of-sale terminals, including cash, check, credit card, financial aid, and gift cards
- Quick-reading laser barcode scanner, magnetic swipe reader, signature capture, and receipt printer
- Process sales and returns transactions from anywhere with a cellular or Wi-Fi connection
- Intuitive touchscreen technology reflective of how team members use smartphone or tablet technology in their personal life
- Credit card and campus card processing, with ability to read bank and store gift cards on a single device.
- Enhanced card security and compliance with ability to accept EMV transactions through a Bluetooth reader
- Card swipe for associate login and inputting customer information into a transaction
- Made-to-order support
- Printed or emailed customer receipts based on guest preference
