ADD-ONS

Individually licensed modules that are added to WinPRISM empower you to customize a comprehensive accounting program; gather and retain customers through loyalty programs; and manage training, pricing and operational needs efficiently and effectively. Add-Ons create a consistent user interface across all systems, support multiple locations, and provide extensive reporting capabilities.

Accounting modules support multiple inventory valuation methods, including moving average, FIFO, and standard retail, and they interface with third-party solutions to help avoid duplicate entry into multiple systems.

- WinPRISM IAS Accounts Receivable
- WinPRISM IAS Accounts Payable Program
- WinPRISM IAS General Ledger
